## About Us

Al Fayhaa Company was established in 2012 as an Egyptian joint-stock company to keep pace with the rapid development in the plastics industry and to support local manufacturing, contributing to reducing dependence on imported packaging products.

The company officially began operations in 2013 in the field of food packaging manufacturing. Our products were introduced to the local market and quickly gained strong customer acceptance due to their quality, reliability, and competitive pricing.

We supply a wide range of plastic packaging solutions, including containers and cups, serving many major restaurants, hotels, and food businesses while maintaining the highest standards of food safety and quality.

As part of our continuous growth strategy, the company has expanded into several international markets across Europe, Africa, and the Arab region, where our products have earned recognition for both quality and value.

Our facilities include advanced sheet extrusion lines along with modern thermoforming machines capable of producing plastic containers, cups, and lids in various sizes, shapes, and colors. We also provide high-quality printing services customized to meet client requirements.

Our team consists of skilled workers, experienced engineers, and specialized technicians supervised by a strong quality control department to ensure products that meet international competitiveness standards.

Additionally, our professional sales team is always ready to receive customer orders and deliver solutions tailored to their specific needs.

Our production relies on high-quality food-grade plastic raw materials, including PP – PET , ensuring both safety and durability.
